Estonia energy efficiency

The widespread use of smart meters, integration into the EU electricity market, and connections with neighboring countries are integral aspects of Estonia"s energy landscape. As Estonia continues to evolve its energy ...

BAKU, Azerbaijan, July 24. Estonia, one of the Northern European leaders in maritime green technologies and ship retrofitting, has launched a EUR25 million government grant designed to encourage the reconstruction and greening of ...

The report highlights that while renewable-energy and energy-efficiency contributions now closely align with the bloc"s 42.5 percent and 11.7 percent 2030 targets, respectively, distortions remain across sectors.

Elevator data improves comfort and energy efficiency at Estonia"s largest business campus We are setting new standards for smarter, more sustainable buildings with a ground-breaking ...

Improving energy efficiency and reliability go hand in hand for ABB. The company recently broke its own world record for energy efficiency in large synchronous electric motors with a new motor designed in line with its Top Industrial ...

"This research is another example among growing data that show how closely related energy choices are to public health," says study coauthor Dr. Jonathan Buonocore, assistant ...

A new study by Boston University and Harvard researchers highlights the stark health benefits of energy-efficient strategies in Eastern Europe, which are up to 10 times higher than in Western ...

Our innovative collaboration in Tallinn"s Ülemiste City uses KONE elevator data to optimize the energy consumption of heating, ventilation, and air conditioning (HVAC) systems, reducing ...

Smart urban innovation Elevator data improves comfort and energy efficiency at Estonia"s largest business campus We are setting new standards for smarter, more sustainable buildings with a ground-breaking solution.

These large-scale heating systems are more efficient and less polluting than individual boilers. Nordic countries have also focused on energy efficiency, including innovations in low-energy ...

A positive example of progress in this area is Estonia"s Estfeed Datahub, a platform that supports smart data sharing in the electricity market. Launched in September 2024 by Elering, Estonia"s ...

Key Components of Estonia"s Tech Framework Estonia"s approach to technology development is built on a

solid foundation of government policies and support structures. The government ...

How "big beautiful" affects clean energy tax credits and home efficiency upgrades for Colorado"s mountain towns Tax breaks for home appliances, solar panels and electric vehicles will end ...

In 2019, Estonia was the most carbon intensive and third most energy-intensive economy in the OECD [7], burdened by the high share of oil shale in the electricity production and relatively ...
