Causes of Power Steering Fluid Leak. In your Chevy Express, a power steering fluid leak can happen for various reasons. This section will discuss the possible causes of such leaks and will focus on the following sub-sections: Damaged Steering Pump, Worn-Out Hoses, Seal Failure, and Loose Connections.

I'm still getting bubbles in the power steering pump fluid. When I press the brake pedal now, I get a subtle &quot;air release&quot; sound. It sounds like a very soft air compressor releasing air kind of sound - hard to perfectly describe. I'm thinking this all points to having air in the power steering system/hydro boost.

\* Most 2500 and 3500 series GMC/Chevy trucks; ... The most effective way to remove air in these systems is to apply a vacuum to the power steering pump reservoir. This technique can be used on most power steering systems. ... Normal driving conditions will remove air that remains trapped within the system when components are properly installed ...

The &quot;EVO&quot; controls the flow rate/ pressure on the latter gmt400's at low speed it is supposed to allow more fluid than at higher speeds. If that system has failed then it could in theory stop flow out of the pump or at least limit it to the point the power steering will not work
