I am waiting for a Diamond K9000 power tilt over mount to arrive. The plan is to mount on the roof rack side rail to the inside or on the crossbar. Diamond offers a C101 cable that is long enough to go up the post behind the driver and at 1/8 in diameter the cable can pass through the closure on the door and it's weather seal.

Need a bit of help. I have a 1998 Ford Expedition, Eddie Bauer 5.4. Last fall I replaced the alternator and made sure the battery was holding and fully charged. All has been well until today. Came home from the dump and the wife had more garbage for me, so an hour later off to the dump...

My wife drives a 1998 EB Expedition w/ 5.4 Triton V-8 and 128,000 miles. This summer we noticed the vehicle losing power, particularly when we towed our pop up camper through the mountains. Prior to this summer we could cruise up the Rockies at 75 with the a/c running and fully loaded- this summer we can barely break 45.

I built a small roof mount console out of fiberglass -gelcoat to match interior-grey in my case.(a lot easier than you might think). I can now simply slide my Dell laptop w/dvd in the console-upside down,meaning the top of the laptop is facing the floor when closed, connect two hidden wires (one for audio/one for power).
