The video above shows you the steps needed to check the power steering fluid level in your 2003 Ford Escape. Checking the power steering fluid level in your Escape is relatively easy and should be done once a month or if you are experienced difficulty turning the wheel or steering your Escape.

NOTE: A whine heard from the power steering pump can be caused by air in the system. The power steering purge procedure must be carried out prior to any component repair for which power steering noise complaints are accompanied by evidence of aerated fluid. Remove the power steering pump reservoir cap. Check the fluid.

NOTICE: If the air is not purged from the power steering system correctly, premature power steering pump failure can result. The condition can occur on pre-delivery vehicles with evidence of aerated fluid or on vehicles that have had steering component repairs. 1. NOTE: A whine heard from the power steering pump can be caused by air in the system.

Labor costs are estimated between \$44 and \$56. This range does not include taxes and fees, and does not factor in your unique location. Related repairs may also be needed.

I lost all the power steering fluid in my system. I replaced the hardline I cut, and bolted everything back up nice and snug. Now the problem. I filled the reservoir with fresh fluid, and started the car. The car seems to suck up all the fluid in the reservoir when running, and then returns the fluid to the reservoir when stopped.
