

2014 power closing system mercedes

My understanding has been that the hydraulic system that powers the opening and closing of the trunk lid ("boot lid") is called "self-closing", and the pneumatic system that pulls the lid down the last 1/2" (12mm) is called "soft-close". The PSE system does soft-close (if equipped) on the doors and trunk lid, powers the fancy seat cushions (if ...

Mercedes-Benz power window issues can result from something as simple as a temporary interruption of power supply to a window motor or other component in the system, and are easily repaired. ...
