

The Renewable Energy Data Book for 2016 provides facts and figures on renewable energy deployment in the United States, with context of U.S. and global energy trends. Facts include renewable electricity capacity, generation, and capacity additions for U.S. and global electricity and energy as a whole, and for specific renewable electricity generation technologies.

The DARE 2018 proceedings focus on data analytics for renewable energy integration with special attention to technologies, systems, and society. The papers deal with topics such as time series forecasting, the detection ...

The International Renewable Energy Agency (IRENA) has set out to produce comprehensive, reliable data

sets on renewable energy capacity and use worldwide. The Renewable Energy Statistics 2018 yearbook shows data sets on renewable power-generation capacity for 2008-2017, renewable power generation for 2008-2016 and renewable energy ...

Graphic from the 2017 Renewable Energy Data Book highlights sustained growth in U.S. renewable electricity generation since 2007. This year's edition is the first to include data and trends for electric vehicles and energy storage technologies, in addition to data-centric charts for wind, solar, hydropower, and alternative fuels. ...

In this new edition of Renewable Energy Systems, globally recognized renewable energy researcher and professor, Henrik Lund, sets forth a straightforward, comprehensive methodology for comparing different energy systems' abilities to integrate fluctuating and intermittent renewable energy sources. The book does this by presenting an energy system ...

This book constitutes the revised selected papers from the 6th ECML PKDD Workshop on Data Analytics for Renewable Energy Integration, DARE 2018, held in Dublin, Ireland, in September 2018. The 9 papers presented in this volume were carefully reviewed and selected for inclusion in this boo...

The Transportation Energy Data Book (TEDB) is a compendium of data on transportation with an emphasis on energy. The TEDB is produced by Oak Ridge National Laboratory for the U.S. Department of Energy's Office of Energy Vehicle Technologies Office. Edition ...
