

25 2v lithium ion battery for hoverboard

What is a 25.2v battery for a hoverboard?

The purpose of a 25.2v lithium-ion battery for hoverboards is to power the electromagnetic motors that hold the rider steady while riding. 25.2v of power is the right amount to power two 250w motors, and should not be used as a replacement for a 36v hoverboard battery (which powers two 350w motors).

What is the Mah capacity of a hoverboard battery?

Browse and find your hoverboard battery replacement. Ah:2000mAh,2500mAh,4000mAh, and 4400mAh. Voltage: 36v,25.2v, and 24v. Pack Sizes: 10S2P and 10S1P.

Do hoverboards use lithium-ion batteries?

Nearly all hoverboards use lithium-ion batteries because they are small but store a lot of power. Unfortunately, they are also prone to overheating and explosions. To determine if that's possible with specific hoverboards, UL has tests that stimulate a battery cell heating up and what happens if a battery gets punctured.

Are 36V batteries good for a hoverboard?

The higher the quality 36v battery you have in your hoverboard, the better it will perform. We carry various models of 36v hoverboard batteries that act as a direct replacement to most hoverboards. Finding which one fits your application is fairly straightforward as well.

Do hoverboard batteries come with a dual battery pack?

A hoverboard battery can come with a dual battery pack. If you have such a pack, it's fine to replace it with a bigger 20-cell replacement hoverboard battery pack. Each 20-cell battery has a capacity of 220Ah, making a pack of 20 cells a 4400mAh battery pack.

What is the best battery replacement for a hoverboard?

Samsung and LG batteries are the best options for replacing a hoverboard battery. We currently stock these batteries as they are both high-quality and widely considered to be the safest replacement batteries for a hoverboard. If you have the necessary skills with a screwdriver, you can replace a hoverboard battery.
