

Indexes built to address carbon emissions -- scopes 1, 2 and 3 -- and fossil fuel reserves. Leverage indexes that enable you to minimize portfolio exposure to carbon emissions-related risk. Indexes seek to limit tracking error ...

Carbon pricing is often paired with compensation to carbon-intensive firms to mitigate the risk of carbon leakage. This paper empirically examines the effects of indirect carbon cost ...

The low-carbon economy optimization scheduling objective function is formulated, including two components: maximizing the energy self-sufficiency rate of integrated electricity-hydrogen ...

The Low Carbon and Renewable Energy Economy (LCREE) Survey is the primary source of official information on LCREE activity in the UK. The survey was designed and developed in consultation with stakeholders from ...

The Virginia Clean Economy Act (VCEA), with its demand to eliminate hydrocarbon fuels for electricity in Virginia, will soon take a deeper bite out of bank accounts for many Virginia families and businesses. As of ...

Specifically, the carbon intensity of electricity fell to just 124gCO₂/kWh in 2024. This is 70% lower than it was in 2014 when each unit of electricity was associated with 419gCO₂/kWh. Carbon intensity of UK ...

China will work toward an economic system that prioritizes green, low-carbon and circular growth, and will promote the across-the-board green transformation of its social and economic development in a bid to deliver on its ...

The green and low-carbon transformation of rural energy systems focuses on the multi-energy complementary utilization of renewable energy to construct multi-agent collaborative operation ...

China's carbon neutrality goal by 2060 presents major challenges and opportunities for its electricity market. This study analyzes baseline, low-efficiency, and high-efficiency ...

China reduced energy consumption and carbon dioxide (CO₂) emissions in 2022 amid efforts to promote high-quality and green development, according to an official statistical communique published on Tuesday.

Wydatki związane ze zużyciem energii elektrycznej to najczęściej jeden z największych kosztów eksploatacyjnych gospodarstw domowych. Trudno go uniknąć, gdyż każdego dnia korzystasz ...

Buildings are crucial for achieving carbon reduction and mitigating climate change. China's dual-carbon

35 kWh low-carbon economy

strategy includes ambitious goals for carbon peaking and carbon neutrality in the ...

By integrating the issue of carbon flow in trade with the life cycle carbon footprint analysis of lithium battery, this study provides new insights for reducing carbon emissions in ...

35 kWh low-carbon economy
