

A microfilm about the spirit of craftsmanship in the power grid

What is the spirit of craftsmanship in China's manufacturing industry?

The manufacturing industry in today's modern, high tech world often appears monolithic, characterless and void of what Premier Li Keqiang called "the spirit of craftsmanship." At the push of a button, pre-programmed components are hammered out impersonally, rolling off the assembly line en masse to feed China's economic juggernaut.

Why is the 'spirit of craftsmanship' important in China?

As China enters a new stage of development, it is more important than ever for it to rely closely on the working class and working people, and to promote the "spirit of model workers", the "spirit of work" and the "spirit of craftsmanship". In a nutshell, the "spirit of craftsmanship" is indispensable to creating a higher status in society.

What is the 'spirit of craftsmanship'?

In a nutshell, the "spirit of craftsmanship" is indispensable to creating a higher status in society. And it is not limited to workers in traditional industries, but should be extended to those in all walks of life. In today's information era, big data, the internet of things and artificial intelligence are changing people's lifestyles.
