So I'm currently playing Skyfactory 4, and I'm having trouble extracting power from Mekanism's Advanced Solar Generator. No matter what I do, I can't seem to extract all of the power it's generating. So, it ends up storing up a ton of power in itself that can't be used and it eventually reaches its max energy storage.

It's more that the power generation for solar wasn't changed is the problem I think. Because they changed the recipe to add in the powah solar panels rather than the straight up mekanism ones and the didn't change the power generation to reflect the increased crafting difficulty.
