Who makes American-made solar panels?

American-made solar panels may not always come from American companies, but they are built by American workers. Here's more information about five of the biggest, best companies that make solar panels in the USA. The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Silfab, Jinko Solar, and Mission Solar.

Which companies make solar panels in the USA?

Here's more information about five of the biggest, best companies that make solar panels in the USA. The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Silfab, Jinko Solar, and Mission Solar. These companies produce high-performance solar panels for residential, commercial, and utility-scale installations.

Are solar panels made in America?

Additionally, Tesla Energy, Canadian Solar and Qcells produce some solar panels in the U.S. Although solar panels manufactured in the U.S. are not necessarily higher quality than panels made elsewhere, investing in American-made solar panels supports domestic solar research and helps create jobs.

What are the most popular American-made solar panel brands?

According to Andrei Gorinchenski, senior editor at A1 Solar Store, the most popular American-made solar panel brands are Silfab Solar, Mission Solar and First Solar. Silfab Solar, one of our top-rated solar panel brands, has solar panel factories in the state of Washington and Toronto, Canada.

Are American-made solar panels any good?

It's worth pointing out that none of the American-made solar panels have cracked the very top tier of our performance rankings (those honors belong to Moxeon, REC, and Panasonic, each of which builds their panels in other countries). But U.S.-made panels such as Qcells and Canadian Solar, are ranked close behind.

Why should you choose a solar panel that is made in America?

Choosing a solar panel that is made in the United States supports both American manufacturing and American jobs. Because these panels are designed and tested in the U.S., the specifications provided are true to the environment that you will use them in most of the time.
