The APC Back-UPS ES 350 is a compact uninterruptible power supply (UPS) that offers reliable power backup and surge protection to connected devices. With an output power capacity of 0.35 kVA and an output power of 200 W, this UPS ...

The APC Back-UPS ES 350 is a compact uninterruptible power supply (UPS) that offers reliable power backup and surge protection to connected devices. With an output power capacity of 0.35 kVA and an output power of 200 W, this UPS can provide sufficient power backup for small electronic appliances and devices.

That connection also allows the electronics to monitor the battery's condition and sound any alarms if necessary. How it failed: Another reason the APC battery backup isn't charging is that one or more of the battery connector plugs is loose or has come undone. When that happens, the electrical power can't flow to the battery to recharge it.

Power surge and lightning protection defend vital equipment, while instant battery power backup keeps you working during short power outages. This APC battery backup and surge protector has six surge-protected outlets to safeguard critical office equipment.

Both the terminals and casing are rust resistant so you won't experience loss of power because of faulty connections even in humid conditions. ...
