

# Application for adding photovoltaic panels to factory roof

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

Can solar panels be installed on a warehouse roof?

Solar panels are also less susceptible to damage from wear and tear because they do not have any moving parts. As a result, you can expect little to no repairs. A typical warehouse or factory roof is the perfect landscape for a solar system. These roofs are usually large and flat with ample room for solar panel installation.

Can a factory install a solar system?

To bring these energy costs down, many companies harness the power of renewable energy by adding solar panels to their factory and warehouse roofs. Installing a solar system for your factory allows these facilities to produce their own power on-site for free.

How much can I save by installing solar panels on my roof?

How much can I save on energy costs by installing solar panels on my factory roof? Customers can see a healthy reduction in their bills of up to 80% annually, dependant on the size of the system installed. What is the typical return on investment (ROI) for solar panel installations in industrial buildings?

Can a flat roof be used as a PV system?

Although large, flat roofs on industrial and commercial buildings present a massive opportunity for PV systems, building owners/managers must address two broad issues to ensure the panels and associated components are installed correctly and will operate safely in a variety of conditions:

Why should you install solar power on your warehouse or factory roof?

Solar power is a clean energy alternative that helps reduce greenhouse gas emissions and improve air quality. It's also a renewable energy source, so it will never run out. Installing solar on your warehouse or factory roof demonstrates corporate social responsibility and lowers your carbon footprint.

Explore the financial implications of factory solar panel adoption in our latest article. We break down upfront costs, operational expenses and the potential for long-term savings. Dive into ...

This article summarises guidance developed by Hampshire County Council for the assessment of roofs in order to install photovoltaic panels. A guide to assessing existing roofs for the addition of solar panels.
