Do astrology eclipses always coincide with an event immediately?

In Medieval astrology eclipses did not always coincide with an event immediately. Not necessarily viewed as negative, but powerful. Important if they fall close to planets in the natal chart. Bernadette recommends using tight orbs of 2-3 degrees. Lights up an axis for 12-18 months. In this way not a one time event, but often sequence or series.

What does a 6 month solar eclipse mean in astrology?

A positive link to Uranus makes this a six-month eclipse phase of anticipation and excitement. Like any new moon, a solar eclipse represents the end of one cycle and the beginning of a new cycle. An eclipse cycle of six months not a new moon cycle of four weeks. The strongest and most important aspect in astrology is Sun conjunct Moon.
