

Asus system power error

Just a heads up: I updated (or reinstalled, not sure what version I had before) ASUS System Control Interface V2.2.30.0 from asus and for the last couple of hours, I havent had any pop-ups (it used to be like every 2 minutes). So... whoever is still having this problem, try to update ASUS System Control Interface. It may help.

Bro force exit, format a pendrive to fat32, use asus firmware software and then make battery health to full capacity using myasus Now flash firmware on pendrive Now charge laptop to 100 Then shutdown Now press power and F2 immediately to enter bios Now update on charging on

System diagnosis for Hardware check. Execute MyASUS system diagnosis for Hardware check, here you can learn more about MyASUS System Diagnosis.

I have updated bios for a ASUS F75A (2012) without battery. Download the new bios (for me X75A1AS.412) and copy it on USB key (FAT32). Start and enter bios, then in bios menu : "Advanced" -> "Start Easy Flash" When the system will display that you can not update the bios because there is no battery, on your keyboard you enter "risky";

Constant notification pop up like the image. I tried to fix it by uninstall system control interface and my asus then reinstall them again, however it seem to become worsen as to i just plug in and pop up. Is this false notification or something wrong with my charger? It's become very annoying becau...
