

Solar and wind are now the cheapest sources of power on Earth, and clean energy sectors are creating jobs, boosting growth and powering progress -- despite fossil fuels still receiving far ...

The Cheaper Home Batteries Program is helping more Australians save on energy bills and cut their emissions with cheap, renewable energy. From 1 July 2025, households and small ...

Intellihub is proud to announce a groundbreaking partnership with Bunnings to launch Zelora --a new solar and battery subscription service designed to make home electrification more ...

A Virtual Power Plant is essentially a network of distributed energy resources (like home batteries, solar panels, EV chargers, smart appliances) that are coordinated via software to function as a ...

Kazakhstan is making significant strides in renewable energy, with the latest figures revealing that renewable sources accounted for 6.81% of the nation's total electricity generation in the first ...

The Australian government has maintained its faith in SunCable's plans to build one of the world's largest solar and battery energy storage projects, complete with the world's largest subsea...

Australia's clean energy sector is seeing a flood of capital and activity as global players including KKR, Soul Patts and Carnegie Clean Energy ramp up investment in solar, storage and wave ...

The International Renewable Energy Agency's latest report finds little change in the global average levelised cost of electricity for utility-scale solar plants year-on-year, while the global ...

Solar energy is becoming an increasingly popular source of electricity in Australia. As of 2023, rooftop solar photovoltaic (PV) systems account for over 10% of Australia's electricity supply, ...

A densely populated region in Asia, with very limited space for large solar parks or other large-scale renewable energy infrastructure, scarce natural resources, and heavy reliance on energy ...

ASTANA, Kazakhstan (MNTV) -- Kazakhstan's renewable energy sector continues to grow steadily, with clean power facilities generating more than 4.2 billion kilowatt-hours (kWh) of electricity in the first half of 2025, according to ...

Thinking about solar for your home? This friendly guide for Aussie families explains how solar power works, how much you'll need, what it really costs, and the key questions to ask--written ...

Australia solar power astana

Solar Energy utilises our natural sun resources to provide power. Our primary focus is utilisation of solar photovoltaic panels that convert the sunlight to directly produce an electrical current.
