

Austria energy group

Who is austriaenergy group?

To date, the Group has developed sites and integrated technologies in approximately 1,000 MW between photovoltaic (PV) and wind energy, these between Europe and Latin America. Since its beginning in Spain the AustriaEnergy Group has expanded its sphere of action, opening subsidiaries in Italy and Eastern Europe.

Why is austriaenergy a leader in photovoltaic & wind power?

Since 2013 also in Chile, where photovoltaic and wind power plants with an output of close to 1,000 MW have been developed and the respective technology integrated, in part put into operation and the remaining once in construction or financing. This makes AustriaEnergy being one of the leaders and pioneers in these areas.

How will the energy crisis affect agriculture in Austria?

Different sectors are likely to be affected in a variety of ways. In an interview Reinhard Wolf, head of Austria's biggest agricultural operator, the co-operative Raiffeisen Ware, says that, while the energy crisis is a concern, farming in the country is so far proving resilient thanks to high prices that are increasing margins.

Is Austria's agriculture a 'resilient' country?

In an interview Reinhard Wolf, head of Austria's biggest agricultural operator, the co-operative Raiffeisen Ware, says that, while the energy crisis is a concern, farming in the country is so far proving resilient thanks to high prices that are increasing margins. "I am optimistic for 2024 and 2025," Wolf says.
