A quiet, reliable Honda Generator can easily help keep your family safe and secure ...

For thunderstorms, hurricanes, and other emergencies, a generator provides a home backup for power outages. However, purchasing a portable generator comes with a big price tag. High-end portable generators can cost between \$800-\$1,500, while smaller models can still set you back several hundred.

Fuel is stored in an underground tank or supplied by your home's natural gas. Standby generators are larger than portable generators (7,500 watts to 48,000 watts or more), and they're more expensive, running anywhere from \$5,000 to more than \$25,000. Standby generators need to be professionally installed by a licensed electrician.

Home standby generators are low maintenance and kick on automatically when the power is lost. With larger capacities, they can do more than just keep the lights on. Whether you need a home backup generator to power your whole house or just a few rooms, you will have no problem selecting the home backup generator that's right for you.

Home Backup Generators. When storms hit, blackouts occur regularly with such weather events, so, wouldn't you rather have a backup source of power to keep your family safe as the storm rages? A power outage can be a pretty scary time, especially if you have young children or elderly relatives living with you, or if you are someone who depends ...
