The Sea Serpent is a mythological marine creature that spawns in the ocean. This scaly mob comes from the Ice and Fire mod. It is hostile and will kill you easily in early game. Sea Serpents are hostile mobs that cannot be tamed in any way. They attack by either shooting water beams like a guardian, or biting at close range. Sea Serpents are found in deep oceans. They can ...

Fire Dragon: Places eggs in fire. Ice Dragon: Places eggs in water. Lightning Dragon: Place the egg in a place where it can catch rain and let it rain. Dragon eggs are only dropped by level 4-5 female dragons living deep in caves, so if you go on a dragon hunt targeting eggs, you must be careful about patience.

Dragon Meal are used to grow and level up your dragons. Sickly Dragon Meal, on the other hand, stops dragon growth entirely. Dragon Meal can be crafted with bones and any sort of meat, not including fish. Some mods, such as Pam's Harvestcraft, have compatibility - their meat can also be used. Each meal will level up the dragon's progress by one day, efficiently skipping a day's ...

Ice and Fire Mod (1.20.1, 1.19.2) hopes to give you a true dragon experience. Currently, Dragons have two types: Ice and Fire. Fire Dragons breathe fire and roam most of the habitable world, whilst Ice Dragons inhabit the coldest places known to man and freeze their prey to death. Both kinds of dragons spawn naturally as adults.
