The first step in building a DIY LifePO4 battery box is to choose the right box for your project. The battery box should be durable, heat-resistant, and capable of safely housing the LifePO4 battery. Look for a box made of materials such as ABS plastic or aluminum, as they offer good thermal conductivity and are resistant to impact and corrosion.

Lithium batteries should be kept at around 40-50% State of Charge (SoC) to be ready for immediate use - this is approximately 3.8 Volts per cell - while tests have suggested that if this battery type is kept fully charged the recoverable capacity is reduced over time.

Create your own portable power station.
