Are be quiet power supplies overpriced?

I'm saving up for a build and I've found that be quiet power supplies aren't too overpriced in my country, which most brands are. The be quiet! System Power U9 600W is selling at about the equivalent of 70 USD here. The 700W one is selling for a bit over 80 USD. Be Quiet! System Power U9 600W-700W

Is a 600W pure power 9 quiet?

We received the 600W Pure Power 9 (L9-CM-600W) for testing. It sports two +12V rails, and be quiet! claims the PSU is silent even under full load. Its fan has a max speed of 1800 RPM, so obviously the control circuit needs to stay conservative, else it wouldn't facilitate low noise output under high operating temperatures.

Is be quiet 850W a good power supply?

Be quiet! today launches their latest System Power 10 line of power supply units and with me I have the 850W variant. be quiet! is a premium brand of power supplies, PC cases and cooling solutions for desktop PCs. The products of be quiet! offer legendary quiet operation and first-class performance thanks to the passion for quality and precision.

Can a system power 8 600W be installed in a mainstream build?

We'd be happy to install something like the be quiet! System Power 8 600W into a mainstream build, and many system integrators will choose to do exactly that, but while these are fine for mainstream units they lack the reliability and quality you'd like to see in an enthusiast power supply.

Is system power 8 quiet?

According to be quiet! it's practically inaudible up to 50 per cent load (300W) and then rises steadily and predictably until full chat. System Power 8 needs to be installed into a wide range of chassis - big and small - so the 140mm depth makes sense. The other dimensions are typical, too, at 150mm wide and 86mm high.

How does pure power 9 600W PSU work?

Here's how it works. be quiet!'s Pure Power 9 600W PSU is a very silent power supply based on a platform that doesn't offer good performance when the loads are highly unbalanced among the +12V and 5V rails. Efficiency is good though and with a price lower than \$70 it will be highly competitive.
