Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Are solar panels a good idea?

By harnessing low carbon solar electricity, a typical home solar panel system could save around 800kg of carbon a year depending on where you live in the UK. This makes solar a great way to cut your carbon footprint. By harnessing low carbon solar electricity, a typical home solar panel system could save around 800kg of carbon a year depending on where you live in the UK. Do solar photovoltaic energy benefits outweigh the costs?

This article appears in the Spring 2020 issue of Energy Futures, the magazine of the MIT Energy Initiative. Benefits of solar photovoltaic energy generation outweigh the costs, according to new research from the MIT Energy Initiative.

Are solar panels a good investment?

A greener home is without doubt more attractive in more ways than one. According to research conducted by FirstPort in 2023, potential buyers are willing to pay an average of £2,038 more for a home with solar panels installed. What's more, the more time you spend in your home with solar panels before moving, the bigger the uplift in house value.

Should you add solar panel batteries to your solar system?

And, with the cost of solar panel batteries said to be gradually reducing, this is advantageous for homes that already have solar panels installed but that are thinking of adding batteries to their PV system to store excess energy.

Are solar panels good for the environment?

The primary reason solar panels are good for the environment is down to their carbon-busting technology. In fact, the average residential solar panel system in the UK saves 0.7 tonnes of carbon dioxide each year. So, amidst the din of 'climate emergency' klaxons, it's about time you ditched those grubby fossil fuels. They're silent.
