The State of Colorado established a program which allows everyone - Renters, Homeowners and Business - to reap the benefits of clean, renewable energy. This program, called a Community Solar Garden (CSG), allows companies like Clean Focus to build large solar arrays that send energy to the local Black Hills Energy grid.

If you are receiving electric service in Southern Colorado from Black Hills Energy and plan to install a private on-site solar system on an existing home or business, your account must be active and current at the site of the proposed installation. For new construction, please contact the program administrator.

When your solar system produces energy, you begin using this energy right away, in real time. You may not be using all of it, and some of it goes back to the Black Hills Energy grid. This amount of energy will offset your total energy bill this month and potentially in the future depending on the production of your system.

You need an energy partner that's always looking ahead. That's why we, at Black Hills Energy, are always ready. Ready to support, inspire, and drive your next adventure--whatever it might be. Because supporting your day-to-day, is our everyday. ...
