In this BrainPOP movie, Tim and Moby will teach you about the outer reaches of our solar system! You'll first learn about the planet-like objects recently found in the boonies of the solar system. Plus, is there really a Planet X? Then, tour the outer limits of our galactic neighborhood. You'll find out about the Kuiper belt and Oort cloud, as well as where, exactly, the solar system ends.

BrainPOP recommends reading the movie description that appears on the Solar System Topic Page to your class. Then show the movie once through without pausing. Watch it again, this time using the discussion prompts.

Explore the BrainPOP Build a Solar System Game and preview the movie topic page. Make copies of the Graphic Organizer. The Build a Solar System game allows students to experiment with the behaviors of various solar systems. The program models the gravitational attraction of stars and planets, and students drag the planets into a rotation.
