

# Can photovoltaic panels be installed on adobe roof

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Can solar panels be installed on a flat roof?

You can have solar panels on a flat roof, but they need a specialist mounting system to raise them to a suitable angle and provide ballast. Designing the system also requires a compromise between packing the available space and leaving room for shading between rows of modules.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Where should a photovoltaic system be installed?

The ideal place to put a photovoltaic system is on the rooftop, as it's generally the spot most exposed to the sun and would otherwise be unused space. But which types of roof are suitable for solar panels? The first step is to make sure you own your roof.

Which roof is best for solar panels?

No one type of roof is best for solar panels - mounting solutions exist for just about every roof out there. Some roofs will cost more to mount solar panels on. This is due to the different equipment installers need to use. Start comparing customized solar quotes today on the EnergySage Marketplace.

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m<sup>2</sup>, and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.
