

Can wooden lockers be destroyed

Why are lockers considered bad?

Lockers can be considered bad for several reasons. According to a student who wishes to remain anonymous, "they take time out to get to your class" due to the need to stop at the lockers before going to class. Another reason given by a teacher named Martel is that "students can hide things that teachers and staff can't necessarily see" in their lockers.

What happens if items are destroyed or disposed of 'wrongfully'?

Where items are destroyed or disposed of 'wrongfully' (e.g. without the consent of the owner of those goods), the owner of the goods may have a claim in damages (compensation) for the value of the goods.

What happens if a landlord does not take a risk?

Where the benefits do not outweigh the risks, it may be that the landlord or management company elects to take the risk and to dispose of the items some other way, taking the view that the owner has abandoned them and has no intention of collecting them.

Wood lockers can also be repaired or refinished if they get damaged or scratched, which can help to extend their lifespan. Conversely, metal lockers are more prone to dents and scratches and are not likely to hold up as ...

You can try to pick them up and put them in the trash (you need to scan one first to be able to build it). I use the trash to destroy items i dont need it should work but never tried with lockers. ...
