The inverter is selected according to system requirements. The inverter power should match the maximum PV modules power, and the DC/AC ratio should match the radiation condition, basically 1.1 to 1.3 DC/AC ratio can be selected, and Canadian Solar inverter support 1.3 DC/AC ratio.

Canadian Solar's grid-tied, transformer-less string inverters help to accelerate the use of three-phase string architecture for residential and commercial rooftop applications. An NRTL approved, cost-effective alternative to MLPE, these inverters are modular design building blocks that provide high yield and enable significant BoS cost savings.

CSI Solar consists of solar module and battery energy storage manufacturing, and delivery of total system

Power inverters vary widely in wattage, from 300W to 3,000W and up. Some can even generate surge power as high as 6,000W. Most power inverters have two standard AC outlets for various electronic devices. Other models offer additional AC outlets and often USB ports to charge all of your devices--from laptops to fans and flood flights.

The Canadian Solar EP Cube is an all-in-one hybrid energy storage solution that seamlessly integrates a hybrid inverter with stackable battery modules, designed for both new and retrofit solar systems. The EP Cube hybrid inverter supports up to 16A per PV string and features four MPPT connections, ensuring maximum solar energy conversion and storage.

The best power inverters should have high wattage, plenty of outlets, resistance to overloads, short circuits, and high temperatures to keep your devices safe. A power inverter can turn DC power into power for AC devices (typical for most consumer electronics). Our top pick for the category is the KRIEGER 1100-watt inverter.
