

Developed by China Huaneng Group in partnership with Dongfang Electric, the unit is rated for 17 MW and is being reported as having the highest single-unit capacity and largest rotor diameter.

On June 26, the construction of the world's largest power generation-side energy storage project in Ulan Chab, Inner Mongolia, officially began. This 1 GW/6 GWh project, using lithium iron ...

The Dept. of Commerce today revealed its preliminary antidumping (AD) rates in the trade case involving battery anode material from China. Almost every significant battery exporter to the ...

The global sustainable energy solutions market is experiencing robust growth, projected to reach \$136.17 billion in 2025, expanding at a compound annual growth rate (CAGR) of 9.4% from ...

China's Top 15 Lithium-Ion Battery Manufacturers (2025) China dominates the global lithium-ion battery market, supplying ~70% of worldwide capacity and housing innovation leaders driving ...

With strong policy guidance and incentives, China has the potential to commercialize green hydrogen technologies to transform its industrial system and the wider economy, the report said. Hydrogen is crucial to the net-zero ...

China will launch initiatives to boost technology innovation in the new-type energy storage sector, including measures to speed up the upgrading of mature technologies such as lithium batteries and support disruptive ...

China Huaneng Group said the Ruijin operation has become one of the most secure, clean and effective coal-fired power plants in the country, with tech-enabled transformation that combines new technologies with traditional ...

China Huaneng Group has signed 14 purchase agreements with a total contract worth of almost 2.9 billion yuan (\$403.7 million) during the fifth China International Import Expo (CIIE), the company said on Sunday.

This undated photo shows the world's most powerful direct-drive floating wind turbine in Fuqing, southeast China's Fujian Province. (China Huaneng Group/Handout via Xinhua) China has ...

China -- As the global lithium battery market continues its explosive growth--driven by surging electric vehicle (EV) adoption and renewable energy storage demands--HDPOWER has ...

Opportunities arise The fluctuation in renewable electricity generation provides opportunities for companies such as Huaneng. The Minety Phase 1 project, which consists of two adjacent 49.9MW batteries and is the ...
