The DC input voltage range can reach up to 1000V allowing for more flexible the system configuration. Built using low loss magnetic material and advanced control algorithm, these inverters can reach a maximum efficiency of 98.5%. 50MW Solar Power Station in Jinta Address: Gansu, China Scale: 50MW Inverter: CPS SC500KTL

with various commercial rooftop systems and distributed power station systems. Normally, the system mainly consists of PV modules, DC power distribution equipments, PV inverter and AC power distribution equipments (Figure 2-1). The inverter converts the DC from PV modules to AC with the same frequency and phase as the AC grid.

Chint Power's new 350kW North American version high-power inverter is another breakthrough and innovation in the field of high-power series inverters since the 275kW series inverter. Its excellent temperature design ensures that the inverter can still operate at full power at 45 °C, greatly improving the system's power generation efficiency.

The CPS America product lineup includes 3-phase string inverters from 25kW to 275kW, exceptional data communication and controls, and energy storage solutions designed for seamless integration with CPS America systems. CPS America has offices in California, New Jersey, and Texas. Learn more at

The 200kW/200kVA high power CPS three phase energy storage inverter is designed for use in commercial and utility-scale grid-tied energy storage systems. The inverter is optimized to meet the needs of the most demanding energy storage applications including demand charge reduction, power quality, load shifting, and ancillary grid support ...

Chint power system solutions. To meet the challenge of the high proportion of new energy grid connections, Chint Power has built a comprehensive and efficient ground power station photovoltaic system solution, including inverter, combiner box (two types), Cluster bracket, SKID (4.2/3.3/2.8 MVA).
