Who is Chord company?

Award-winning cables. Chord Company has been producing high-performance cables and equipment for hi-fi and home cinema systems since 1985. We go to great lengths and precise tolerances to produce our award-winning cables, power and noise-reduction products. Every component is designed/chosen for optimum performance.

Are chord Company cables still a good brand?

Originally concentrated on building interconnects, Chord Company cables had early success with Cobra RCA and XLR interconnect cables followed by the Chord Chameleon analog cables- which are still in the line-up today and selling better than ever.

Who is chord music?

The Chord Company has been designing and manufacturing cables for over 30 years now and along the way it has gained a considerable reputation for quality and value. Chord's high-end models have been getting better and better, but it was a chance conversation that led to the creation of ChordMusic.

What is Chord company signature XL speaker cable?

Chord Company Signature XL Speaker Cable is the latest version of one of our longest running (and universally loved) products.

Does chord company make analogue interconnects?

Chord Company has been evolving its Clearway line of analogue interconnects with every generation. Last year's version, the Chord Company Clearway RCA Analogue (2022) delivered incremental but clear improvements with only some minor physical upgrades, and took home the prize for the Best Analogue Interconnect over £163,100 at the What Hi-Fi?

Where did chord come from?

Founder Sally Kennedy started the company in her home, building the very first cables in her kitchen! Quickly exceeding the capacity of each new production facility, Chord made its final move to its current Wiltshire UK location in 2004.

Even the solid aluminium construction was chosen to reduce vibration and thus microphony. Inside, you will find heavy-gauge cables throughout, with meaty sockets affixed. This block is the company's flagship ...

The Chord Company PowerHAUS mains block is the distillation of decades working with signal and power transfer and benefits from a unique version of our acclaimed ARAY technology (MainsARAY) which has been specially adapted ...

notable step up from last year's Award-winner, and a worthwhile investment if you want to upgrade your system's overall sound quality.

David Robson continues his Chord Company "Cable Doctor" series of reviews, where specific cable combinations are recommended for his system by Nigel Finn of Chord. Previously he has focused on the entry level C Line and Clearway cables but now moves up to the new Shawline series interconnects and digital cable, along with the Epic Twin ...

We've been selling Chord Company cables since we first opened our showroom in 2007. Back then, the original Chord Crimson had just come out, hot on the heels of the original Chord Calypso (remember that!) and very shortly received awards from the hi-fi press, along with the Chord Cobra and Chord Chameleon.

(Image credit: Chord) For its latest iteration, Chord has sensibly chosen to build on this solid foundation rather than start with a blank sheet, so much about this new generation feels familiar. We have high purity OFC (Oxygen Free Copper) multi-strand conductors configured in a twisted pair arrangement to improve interference rejection.

Even the solid aluminium construction was chosen to reduce vibration and thus microphony. Inside, you will find heavy-gauge cables throughout, with meaty sockets affixed. This block is the company's flagship offering which means that it includes three hybrid MainsARRAYs fitted in parallel (rather than in series) to the bus bars, outside of the ...

Only Chord, on the odd occasion, has managed to claim performance leadership, though once that happens, QED tends to get all upset and raise the bar again. Well, it looks very much as if QED will have to get its thinking hat on once again because, with this Carnival SilverScreen cable, Chord has come up with a gem. Or should that be solid gold?

The Chord ClearwayX RCA interconnect shares the same characteristics as its predecessors, with our system retaining high levels of clarity, crisp leading edges, rhythmic cohesion and even-handed tonal balance.

Worth noting that Chord are also offering ""In addition to factory terminations, the cable can also be professionally terminated by participating Chord Company dealers equipped with the new ChordOhmic Hex Gun tool; the service not only delivers tailor-made lengths, but it also jumps the build queue at the factory. Existing cables can also ...
