

Colored steel tile photovoltaic bracket position layout

What is a ballast flat roof solar bracket system?

SOEASY Ballast flat roof Solar Bracket System is a solution developed for non-penetrating flat roofs. It is a flat roof PV bracket product that can be applied to a variety of mounting angles, and is suitable for installation in areas with moderate wind pressure of 44m/s.

What is a solar tripod bracket system?

The unique design of patented accessories brings you more fast installation experience. SOEASY Solar Tripod Bracket System is a non-penetrating bracket system solution for flat roofs, suitable for commercial or residential flat roof PV systems, where the entire system is secured by the use of cement ballast to achieve high wind resistance.

Can I install a PV system on a tiled roof?

Both systems are available as top-fix and side-fix. In short: the mounting of the rail system on the tiled roof can be done from above as well as from the side. But no matter which of our pitched roof mounting systems for installing a PV system on a tiled or plain tile roof you choose: all systems are particularly easy and efficient to install.

Another connection method is to cut the roof panel at the position of the fixed bracket and connect it to the roof steel beam through the steel column. The above is a summary of the layout of photovoltaic brackets on main-color steel roofs. ...

Roof bracket is generally divided into three categories: color steel roof bracket, sloping roof (tile roof) bracket and flat roof bracket. Color steel plate roof bracket mainly consists of color steel plate fixture or fixed parts, rail ...
