

# Connecting wires for container energy storage cabinets

How do you wire a container?

For a tidy looking container, all wiring is surface mounted in plastic conduit by welding steel batons onto the container. If your container is ply lined then we fit directly onto the ply. We never drill directly into the container walls/ceiling as this compromises the watertightness of the container.

What is electrical design for a battery energy storage system (BESS) container?

Electrical design for a Battery Energy Storage System (BESS) container involves planning and specifying the components, wiring, and protection measures required for a safe and efficient operation. Key elements of electrical design include:
