

Current home solar company

Is current home a good solar company?

Overall, we are more than pleased with our solar project with Current Home. We run 100% on Solar and the size of our system was accurately measured. Our salesman, Efjay was awesome and answered all our questions, and the coordinator Justina was excellent at keeping us updated during the installation.

Should you go solar with current home?

When searching for "solar panel installers near me," reap economic and environmental benefits from going solar with Current Home. For many homeowners, going solar is a way to save money on their utility bills in the future. Some of your home's electrical needs can be met by solar panels, if not all.

Can you sell a solar-powered home in California?

If you plan to sell your solar-powered home, expect to fetch a market price of 4.1% higher than homes without solar panels. Newly constructed commercial premises in California will be required to have solar panels starting in 2023, according to the state's new law.

Are solar panels a good investment?

With a solar panel installation, the ROI comes from energy cost savings after paying for itself throughout its 25-year lifespan. If you plan to sell your solar-powered home, expect to fetch a market price of 4.1% higher than homes without solar panels.

What is the difference between commercial and residential solar panels?

Size: Solar panels used in commercial applications are bigger than ones for residential use, often consisting of 96 cells and measuring 78 by 39 inches. Residential panels only have 72 cells and measure 65 by 39 inches. The bigger the panels, the more electricity they generate.

Can a solar energy system Save Your Business Money?

A solar energy system can help your business save money on electricity expenditures, which can account for a significant amount of operational expenses. Some businesses save as much as 75% on their utility costs. However, how much you save will largely depend on the size of your solar energy system and the amount of electricity it produces.
