

Deer camera solar panel

Simply use the power cord from the solar panel and plug it into the auxiliary port (AUX) that is typically located at the bottom of your trail camera. I recommend still installing the camera's recommended batteries. These will be used as a back up in the event that the solar panel is not able to produce enough solar energy.

Spy Point Solar Panel. The Spypoint solar panel is a 6.3' x 4.7' solar panel that works on a 12 volt battery system. It comes with a 9 ft cord and a few extra connection cables as well. The problem with the Spypoint solar panel is that even though it is a Spypoint specific product, it doesn't connect directly to any camera because this solar panel does not have an internal battery.
