

Disassembly of Sanjing Photovoltaic Inverter

Can a saj inverter be wet?

Do not touch the surface of the inverter while the housing is wet, otherwise, this may cause electrical shock. Before opening the housing, the SAJ inverter must be disconnected from the grid and PV generator; you must wait for at least five minutes to let the energy storage capacitors completely discharged after disconnecting from power source.

Can a saj inverter be used with a PV generator?

SAJ is not responsible for the loss and these warranty claims. The SAJ inverter must only be operated with PV generator. Do not connect any other source of energy to the SAJ inverter. Be sure that the PV generator and inverter are well grounded to protect properties and persons. The inverter will become hot during operation.

Is Saj responsible if a solar inverter is lost?

SAJ is not responsible for the loss and these warranty claims. The SAJ inverter must only be operated with PV generator. Do not connect any other source of energy to the SAJ inverter. properties and persons. The solar inverter will become hot during operation.

How to connect a solar inverter to a PV array?

The PV array is properly insulated to ground before it is connected to the inverter. Select cables according to the below specification. For details, refer to the inverter user manual. The positive cable is connected to the positive side of the solar panels, and the negative cable is connected to the negative side of the solar panels.

What happens if a saj inverter is unauthorized?

Any unauthorized actions including modification of product functionality of any form may cause lethal hazard to the operator, third parties, the units or their property. SAJ is not responsible for the loss and these warranty claims. The SAJ inverter must only be operated with PV generator.

How does a PV inverter work?

The direct connection between the inverter and high voltage power systems must be operated by qualified technicians in accordance with local and national power grid standards and regulations. When the PV array is exposed to light, it supplies a DC voltage to the inverter.

mobile PV cell where the inverter is so integrated with the PV cell that the solar cell requires disassembly before recovery. 2) PV inverters to convert and condition electrical power of a PV ...
