

Do I need to pay for electricity when installing photovoltaic panels on the roof

Can solar panels be installed on a roof?

“The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.

How much solar energy does a solar installation use?

Even with one of the best solar batteries, you'll typically only use 80% of the solar energy produced by your panels - and your break-even point will be about a decade more. It's important to also take into account how to finance your solar installation as it will impact when you break even.

Do solar panels need a battery?

More and more customers get a battery with their solar panels. Without one, you either use electricity as you generate it, or you export it back to the grid. Getting a battery will add to the cost of your installation. But it means you can store energy, and use it later when you have more need for it.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

How do I finance a solar PV installation?

The most cost-effective way to finance the installation of solar PV panels is to pay in full using your own savings. If you're unable to pay upfront, you could consider a loan or remortgaging.
