

Duke energy sale of renewables

Will Duke Energy sell commercial renewables business to Brookfield renewables?

Duke Energy has agreed to sell its Commercial Renewables business to Brookfield Renewable for about \$2.8 billion. The deal was announced on Monday, June 12 (Reuters).

Will Duke Energy sell its utility-scale renewables business platform?

Duke Energy is also finalizing the sale for its utility-scale renewables business platform, which it expects to close on by the end of 2023. Proceeds from both transactions will be used to strengthen Duke Energy's balance sheet and avoid additional holding company debt issuances.

Will Duke Energy sell its distributed energy business?

Duke Energy is also selling its distributed energy business, which is separate from its utility-scale Commercial Renewables business. Duke Energy (NYSE: DUK), a Fortune 150 company headquartered in Charlotte, N.C., is one of America's largest energy holding companies. The sale of the distributed energy business is expected to close by year-end 2023.

Will Duke Energy sell REC Solar?

"We have received indications of interest for the utility scale business at attractive valuations," Good said. Duke Energy expects to sell its distributed generation business, which includes REC Solar, separately, according to Good. The sale will likely follow a similar timeline to closing as the utility-scale sale, she said.

Is Duke Energy a good company?

In addition, the company is investing in major electric grid enhancements and energy storage and exploring zero-emission power generation technologies such as hydrogen and advanced nuclear. Duke Energy was named to Fortune's 2023 "World's Most Admired Companies" list and Forbes' "World's Best Employers" list.
