

Standardised compact modules with electrical power range between 40 kW and 1,000 kW High and low temperatures of heat sources can be used to generate electricity In high temperature plants, the condensation heat can be supplied at a temperature which enables further use and thus combines heat and power operation 20

Durr Power Tower Silence 120/12 Compressor & Dry Suction System Quiet and space-saving! The Power Tower Silence from Durr Dental combines compressed air and suction in a single housing. With a footprint of just 0.3-0.4 m<sup>2</sup>, the compact and quiet supply unit can be installed flexibly in any practice.

Durr VSA 300 S. The VSA systems combine vacuum generation and separation of air, water, and amalgam in a single compact assembly. When it comes to new installations or modernising existing systems, a system made up of central suction and separation is ...

Durr supplies Power & Free systems at the customer's request. This robust system is easy to maintain and use. ... The vehicles are conveyed transversely from one processing tank to the next, permitting a compact layout with short conveyor sections. ... Sales +49 7142 78-0; sales@durr ; Durr Systems AG Carl-Benz-Str. 34 74321 Bietigheim ...

The advantage of a Cyplan ORC system, as in this case, is the great innovation due to the direct evaporation of the flue gas. The transmission losses of the ORC system are minimized by the simple integration, so that the system achieves the highest efficiency and the best efficiency.

Durr is one of the world's leading mechanical and plant engineering firms with outstanding automation expertise. Products, systems and services offered by Durr enable highly efficient manufacturing processes in different industries. Business with automobile manufacturers and their suppliers accounts for approximately 55% of Durr's sales.

Durr Power Tower Silence 120/12 Compressor & Dry Suction System Quiet and space-saving! The Power Tower Silence from Durr Dental combines compressed air and suction in a single housing. With a footprint of just 0.3-0.4 m<sup>2</sup>, the ...

Finding the right suction system Whether your surgery has one or several treatment rooms, Durr Dental has the solution you need. The power of the suction systems is based on a factor of 300, which represents a suction power of 300 l/min on the large suction cannula. For example, the V 600 has the power of two operator workstations working at the same time.

Compact design was the focus during the Fluid Board's development, so the system can also be installed in

## Durr compact power system

small spaces, making it a unique offering in the market. The first product with EcoDocu The Fluid Board is the first product from the industrial painting technology field that Durr provides with digital, technical documentation.

Durr's Eco+Energy Compact Power System (CPS) employs micro gas turbine technology to generate heat and power economically and highly efficiently. We use cookies, similar technologies and tracking services. This website uses cookies, similar technologies and tracking services (hereinafter referred to as "Cookies"). We need your consent ...

In its technology center in Bietigheim-Bissingen, Durr now presents the next stage in the evolution of its proven Cyplan ORC systems. The most obvious of its impressive features is its modular design. It is even more ...

Ivoclar Australia offers Durr Dental Tyscor systems, providing reliable, efficient suction and separation technology for modern dental practices. ... The compact, modular design weighs 11 kg and has a housing unit made from noise-absorbing foamed plastic ensuring ease of use as well as quick and easy maintenance. ... Electrical power (kW) 0.7 ...

Durr also offers high-performance systems for air pollution control. ... and decentral power generation. Durr was founded in 1895 and is based in Bietigheim-Bissingen, Germany. ... A modular paint supply station that integrates necessary components into a compact design, suitable for various industrial applications requiring paint supply.

Cost-effective and compact In the case of VS Suction Units, aspiration and separation are combined centrally on one drive

Durr Compact 80C Ecoclean. Parts Wash System . CONTROL Siemens Simatic OP17; CAPACITY: 900L; BATCH WEIGHT: 70KG; HEATING POWER 9 - 15,75 KW; CYCLE TIME: 6-15 min; CONNECTION VOLTAGE 3X400V; HEATING CAPACITY: 9-15,75 kW (INSTALLED LOAD) MOTOR CAPACITY: 14-33 kW; PREASURED AIR PRESSURE CONSUMPTION: 100L/H;

The Durr Oxi.X RV is a unique, single-bed, flameless regenerative thermal oxidizer (RTO) in a compact, modular design with low running costs for VOC abatement and controlling hazardous air pollutants (HAPs). The system combines high VOC destruction, simple design, reliability, and superior energy efficiency.

Durr Tyscor V2 Dry Line suction System is a revolutionary radial suction machine by Durr Dental, designed to deliver unmatched performance and efficiency. Highlights The Tyscor V2 sets new standards in dental care with its advanced radial technology, offering high suction power, energy efficiency, high quality and quiet operation.

MEGTEC/Universal & Durr Clean Technology Systems combined company will be among the leading providers for industrial air purification systems, acoustic systems and emission technologies MEGTEC/Universal is a strong player in oil & gas, wood products, printing & coating and metals & mining.

In its technology center in Bietigheim-Bissingen, Durr now presents the next stage in the evolution of its proven Cyplan & ORC systems. The most obvious of its impressive features is its modular design. It is even more compact, and so can be adapted to operating conditions with even greater flexibility than conventional ORC systems.
