Every year, thousands of homes and businesses lose power supply for hours or days because of emergencies and natural disasters. Many utility power suppliers and distributors reactively call for support during these incidents, resulting in increased costs, delays to restoring power, and a reduction in cost-efficiency due to over-specification for the emergency response.

The term emergency power is often used differently in everyday life. Our 3 new terms backup power, backup power light and emergency power socket better reflect the functional scope of our products and are therefore now our first choice. Emergency power systems are becoming increasingly relevant for many households.
