

Emergency home generator for home

Which home generator should I buy?

We researched the options and spoke with several experts to select the best home generators you can buy, including our best overall choice, the Briggs and Stratton PowerProtect 26kW Home Standby Generator, chosen for its versatility, power, and reliability.

Do I need a home generator?

The home generator you need depends on a variety of factors, including the type and wattage of the appliances you want to power. For example, if you want to power small appliances, such as a coffee maker or television, we recommend investing in a portable power station.

Should you buy a home generator if you have a power outage?

A power outage may leave you literally caught in the dark, but you can still be prepared by buying a home generator now. Here are the best home generators.

Can I use a portable generator for my home?

You can use a portable generator for your home for short-term and limited power needs. This dual-fuel whole house generator from WEN can be easily converted to operate on propane fuel with the twist of a dial and can produce up to 4,750 surge watts and 3,800 running watts when powered by gasoline.

How do I safely use my home generator?

Here are some critical steps you should take to ensure that you're using your home generator safely: Don't operate a gas generator in an enclosed area, such as a garage or shed, as this can lead to carbon monoxide buildup. Use a fuel stabilizer when you're storing gasoline for an extended period of time, as destabilized gas can be a fire hazard.

Which Generac home generator should I buy?

If you're looking for a well-equipped generator for your most commonly used appliances and conveniences, the Generac Guardian 24kW Home Generator is a great option. It offers the most power of all residential air-cooled generators and can be remotely monitored using Generac's Mobile Link Monitoring System.
