

Electricity is the backbone of Africa's new energy systems, powered increasingly by renewables. Africa is home to 60% of the best solar resources globally, yet only 1% of installed solar PV ...

The WEO-2023 highlights that one area of global energy markets that was hit particularly hard by the global energy crisis is set to see pressures ease in a couple of years. Natural gas markets have been ...

Energy markets began to tighten in 2021 because of a variety of factors, including the extraordinarily rapid economic rebound following the pandemic. But the situation escalated dramatically into a full-blown global ...

One of the world's greatest challenges for the next 50 years is to ensure enough clean, affordable and reliable sources of energy. However, this is also one of the most complex problems facing society today, and there are many ...

Both energy storage and hydrogen - critical emerging technologies for unlocking emissions reductions across energy systems - could become key beneficiaries of stimulus plans, much ...

Meanwhile, Energy Resources Aotearoa, a New Zealand-based energy company, notes that renewable energy sources provide 82% of the country's electricity mix and around 40% of its primary energy.

New technologies, systems, societal organization and policies for energy saving are urgently needed in the context of accelerated climate change, the Ukraine conflict and the ...

The global energy crisis was not a clean energy crisis, but it has focused attention on the importance of ensuring rapid, people-centred and orderly transitions. Three interlinked issues ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil fuel-based power generation with power ...
