

Energy Storage and New Energy Salary Table

How does the UK's energy sector perform compared to other sectors?

UK's oil and gas subsector consistently leads energy pay medians for base pay, incentives and total compensation. At 132% above overall sector-wide rewards, the positive gap remains in line with prior years. Conversely, UK's utilities and water subsectors continue lagging medians substantially, especially in incentive pay.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support schemewill boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

What is the New Energy Outlook?

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible scenarios covering electricity, industry, buildings and transport, and the key drivers shaping these sectors until 2050.

How many GW of battery storage capacity are there in 2022?

Batteries are typically employed for sub-hourly, hourly and daily balancing. Total installed grid-scale battery storage capacity stood at close to 28GW at the end of 2022, most of which was added over the course of the previous 6 years. Compared with 2021, installations rose by more than 75% in 2022, as around 11GW of storage capacity was added.

Is India ready for battery energy storage in 2022?

The Inflation Reduction Act, passed in August 2022, includes an investment tax credit for stand-alone storage, promising to further boost deployments in the future. In its draft national electricity plan, released in September 2022, India has included ambitious targets for the development of battery energy storage.

Will China install 30 GW of energy storage by 2025?

In July 2021 China announced plans to install over 30GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022.
