

Energy commodities trading companies

What does a commodity trader do?

Advises clients on energy markets and trading as well as smart grid, digital, and renewable technologies across the value chain. Advises clients in gas, power, and commodities markets on strategy, investment, growth, and transformation. June 2, 2021 Commodity traders crave volatile markets, and they've had their fair share of them recently:

Do energy and commodities firms need a trading-desk?

Energy and commodities firms' trading-desk operations could benefit from a more active presence in these markets, given higher margins than in more mature markets. However, limited liquidity will trigger a need for strong risk management practices.

Why is commodity trading becoming more competitive?

At the same time, commodity trading has become much more competitive. For example, big industrial companies that purchase large volumes of power and gas are setting up trading desks to procure these products directly on wholesale markets. Energy companies are also expanding across multiple commodities.

How is energy transition redefining the commodity asset class?

The energy transition is redefining the commodity asset class with the arrival of new offerings being differentiated by geography, production methods, regulatory treatment, and environmental impact--and therefore being valued differently by customers.

How will commodity trading change over time?

From a commodity trading standpoint, this transformation will increase structural volatility, disrupt trade flows to open new arbitrages, redefine what it means to be a commodity, and fundamentally alter commercial relationships. All these developments will create unique opportunities and challenges for new and incumbent players alike.

How will commodity trading affect the future?

Our analysis highlights the considerable impact possible through commodity trading in recent years and the underlying developments responsible. In the coming years, the effect of these developments and trends could be magnified, resulting in even more value at stake, which will then attract new players.
