The Oxford Institute for Energy Studies is a world leading independent energy research institute specialising in advanced research into the economics and geopolitics of the energy transition and international energy ...

Renewables like solar and wind are game-changers for a cleaner planet, but they're not without hurdles. Let's break down some key characteristics that make adoption challenging, including...

What's Stopping Renewable Energy? The Truth About Storage, Economics & Solutions Shahadat Hossen Finance, Supply chain and Procurement specialist Published Jul 21, 2025 + Follow

Solar/wind intermittency drives 2-hour to 4-hour storage requirements, favoring modular lithium racks over lead-acid. The US DOE estimates 45GW of new battery storage will integrate with ...

It paves the way for the joint development of battery storage and renewable energy facilities aimed at enhancing the state's energy resilience and aligning with national sustainability goals.

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

The study highlights the sensitivity of BESS deployment to both tariff levels and technological learning rates, with higher tariffs exacerbating declining adoption. Despite these disruptions, global lithium-ion battery price trajectories ...

As the largest independent energy storage facility in southern Xinjiang, this project is expected to provide significant momentum for regional energy transition and economic development.

By the end of the decade, there could be 20 million new jobs across the various energy sectors but in North America, filling these new roles will be a challenge. On Demand Expert Session: Battery Storage Economics and ...

Numerous studies suggest that Chad, located in the African Sahel area, could utilise solar or wind-based electricity generation. This book aims to provide an understanding of potential ...

Industry experts forecast significant growth and innovation in rack-mounted lithium battery storage systems, driven by renewable energy adoption and EV market expansion. The global market ...
