

Abstract Electric vehicles (EVs) are becoming increasingly popular, but their widespread adoption is still limited by issues such as short battery life and limited driving range. To address these ...

Islamabad, July 20, 2025 - The Federal Board of Revenue (FBR), the apex tax body of Pakistan, has issued an official notification detailing the revised customs duty structure on the import of ...

What Are High Power Batteries and How Do They Work? High power batteries are energy storage devices designed to deliver high currents quickly. They are commonly used in applications requiring rapid bursts of energy, such as ...

This is directly linked to the demand for improved battery energy densities, leading to the widespread adoption of nickel-rich cathodes in high-performance batteries. Growth Factors: ...

BYD, the world's largest electric vehicle maker, plans to begin assembling electric and plug-in hybrid cars in Pakistan by mid-2026, aiming to capture surging demand across South Asia. ...

With the escalating global demand for sustainable transportation, Fuel Cell Electric Vehicles (FCEVs) have emerged as a prominently researched domain. In light of this development, an ...

IDTechEx Research Article: The future of energy could be increasingly streamlined, sustainable, and efficient, with battery developments and the integration of machine learning. This article explores the future of energy, from ...

Converting electric cars to batteries helps stabilize the power grid. The technology allows idle vehicles to be used to store and release energy. Pilot projects in Europe are exploring these ...

This paper presents the comprehensive design, simulation, and experimental validation of a grid-tied hybrid renewable energy system tailored for electric vehicle (EV) charging applications.

The Battery Energy Storage System (BESS) has multiple applications and benefits. For example, from a Pakistani market perspective, it functions similarly to net metering, where excess power ...

Australian shipbuilder Incat Tasmania has secured a contract to build two 129-meter-long battery-electric catamarans for Danish ferry operator Molslinjen. The fully electric vessels, which will feature battery systems with a capacity of ...

UN pushes gender-inclusive energy projects China's Coal Capital Is Transforming Into a Clean Energy Hub
Basic Energy sees closing electric vehicle charging deal in Q3 Syria, Saudi Arabia ...

As demand for electric vehicles and energy storage soars, the need for domestic sources of high-quality graphite becomes ever more pressing. NETL's method delivers on this front while ...

Here are four tangible benefits for electric cars, charging stations and energy grids. 1. Supporting Fast Charging. Level 1 EV chargers may need 40-50 hours to charge a battery-electric vehicle, ...

Pakistan imported an estimated 1.25 gigawatt-hours (GWh) of lithium-ion battery packs in 2024 and another 400 megawatt-hours (MWh) in the first two months of 2025, a trend that is likely to ...

The Federal Board of Revenue (FBR) has issued a notification imposing a new levy on petrol and diesel-powered vehicles under the name "Energy Vehicle Adoption Levy." According to the ...

KARACHI: Chinese electric vehicle (EV) giant BYD plans to roll out its first locally assembled car in Pakistan by July or August 2026, aiming to tap into the rapidly growing demand for EVs and ...

Electric vehicles (EVs) have emerged as a pivotal technology for environmental protection, driving the development of battery energy storage systems (BESS) for sustainable charging solutions ...

Energy storage for electric vehicles pakistan
