

- PowerChina's 5.8B yuan Inner Mongolia pumped storage project (1 GW/6 GWh) aims to stabilize the grid and reduce coal reliance by 2026. - Aligned with China's 14th/15th Five-Year Plans, it ...

At peak moments during the day, renewable generation supplied more than 82% of the electricity consumed, according to the Ministry of Energy. The Ministry credited this achievement to [...] ...

Flow batteries represent a unique class of high voltage energy storage systems. They utilize liquid electrolytes containing dissolved energy-carrying chemicals, which flow through a reactor ...

Google has announced that it has signed a global commercial partnership with Milan-based startup Energy Dome and has also invested in its long duration energy storage (LDES) tech ...

1414 Degrees clean energy storage is set to reduce energy costs by increasing the efficiency of renewable generation and stabilising grid supply.1414 Degrees" thermal energy storage system (TESS) is highly ...

By rising human suffering. By growing geo-political divides. But amidst the turmoil, another story is being written. And its implications will be profound. Throughout history, energy has shaped the destiny of humankind - from mastering fire, to ...

Pilot tests of an aquifer thermal energy storage (ATES) system are underway by Mitsubishi Heavy Industries Thermal Systems and Osaka Metropolitan University in Osaka, Japan. The system ...

Google has announced a significant global partnership with the Milan-based startup Energy Dome, along with an investment in its long-duration energy storage (LDES) technology aimed ...

1 Texas is seeing a spike in the cancellation of renewable energy projects and batteries over the past two months due to Trump's tariffs and uncertainty regarding the future of their tax credits.

Energy storage containers make it easier to integrate higher proportions of renewable energy into existing grids without extensive infrastructure upgrades. They help utilities and grid operators ...

04.07.2025, Chisinau - Over 109 MW of grid capacity has been released for potential renewable energy producers who want to invest in the Republic of Moldova. The new free capacities ...

A new round of auctions for the construction of renewable energy production plants is scheduled for October 2025. This will include, for the first time, an energy storage component.The auction ...

The MoU covers the development of battery energy storage systems (BESS) and renewable energy projects, including solar and hybrid solutions, to strengthen the state's energy security ...

The installed capacity of new energy storage projects that were put into operation during the first half of this year in China has reached 8.63 million kilowatts, equivalent to the total installed capacity of previous years in the ...

News Release US\$ 1.2 trillion in battery storage investments needed to support global renewable buildout
Grid-forming battery technology emerges as critical solution for US\$5 trillion global ...

Hydrogen Storage NREL has unique capabilities to conduct megawatt-scale research on hydrogen generation, energy storage, power production, and distribution. Researchers focus on hydrogen storage material ...

From an operational perspective, the integration of photovoltaic solar energy with advanced battery storage addresses the challenges of renewable energy intermittency. The ...

As renewable energy uptake rises, it will be crucial to monitor high-growth areas of expansion, like offshore wind and distributed systems, full-cost factors of incorporation like storage and smarter grids, as well as the flexibility ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...

Energy storage for renewable energy chisinau
