Who is EnMass energy?

Legal Name ENMASS ENERGY CORP. EnMass Energy is focused on making waste-to-energy projects cheaper, better, and easier to maintain by digitizing the most painful part of operations: the supply chain. Our platform is tailored specifically to the procurement and market needs of the growing waste-to-energy space.

What is the EnMass Energy platform?

The EnMass Energy platform is a digital solution created by our founder Andrew in 2012 to help overcome challenges and roadblocks in building waste to energy projects. It was inspired by his own experiences and lack of such a platform in the market.

What is EnMass and how does it work?

Unlike current energy project tools, EnMass has solved for the entire supply chain, from supplier identification through transportation logistics and delivery audits, speeding up the process of converting usable waste products into new energy sources and saving valuable time for enterprise clients.

Why should you invest in EnMass?

Investing in EnMass is a significant early stage opportunity to own a share of technology moving a whole industry forward. We're tearing down barriers and enabling a whole new generation of Waste-to-Energy projects through our 21st century software solutions. If you're looking for a Socially Responsible investment, we're it.

The Waste to Energy (WTE) industry has been making some genuinely innovative and inspiring strides recently. Statista reports there are roughly 86 WTE facilities in the U.S., 400 in Europe, and 300 in other parts of the world, with an increase in waste energy consumption from 397 to 482 BTUs between 2006 and 2017 alone.
