NERI is a university-level research institute that focuses on the development of integrated sustainability solutions for the environment. It collaborates with government agencies, NGOs and leading academic partners to ensure that its ...

How to use placeholders in PostgreSQL? In SQL systems other than Postgres, such as MySQL for instance, prepared statements can use question marks as a placeholder for data in prepared statements. I am not sure how to create placeholders in Postgres.

Nature-based solutions (NbS) are at the forefront of addressing impacts of climate change, especially in urban planning, practice, and research. A growing number of cities worldwide are exploring NbS, sometimes referred to as green ...

Innovative solutions to combat plastic waste pollution are essential for creating a sustainable planet. With millions of tons of plastic polluting the environment each year, technology, policies, and collective action can drive ...

Creating a greener workspace is now a vital responsibility. Businesses everywhere are seeking smarter solutions. One option stands out for style and sustainability. Glass office sliding walls ...

I know this is the piracy sub and all but I would just like to say that if you're financially able to, please don't pirate patreon content. It's not the same as pirating from Disney or some mega-corp. If you're dirt poor then yeah, do what you gotta do...

DBI, Placeholders, and a nested query Edit: Solution found and described below. Hello all, I'm attempting to insert/update into an MSSQL database. The source of the data is another database. Sometimes the source database has new records, and other times there are existing records. So I'm attempting to do this:

Environmental sustainability solutions

Sustainability is the long-term viability of a community, set of social institutions, or societal practice. Sustainability is usually understood as a form of intergenerational ethics that accommodates the economic, social, and ...
