

Farm photovoltaic panel scam exposed case

Are solar panels stolen?

Several instances of solar panel theft have been reported, including an incident at Gateshead International stadium as well as a larger incident in 2021 in which 221 solar panels were stolen from a solar farm. Solar panel theft is the primary issue, although some landowners report that it isn't just the panels themselves that are stolen.

Are solar panels a scam?

With that demand comes fierce competition within the solar panel market. Scams, schemes and straight-up fraud abound in the dark underbelly of an otherwise light-filled industry. While there are still many honest and reliable solar panel companies on the market, it can be hard to differentiate the good guys from the rest.

Did a company defraud solar panel owners?

A company which defrauded solar panel owners by selling them goods and services they did not need has been ordered to pay back its victims hundreds of thousands of pounds.

Is solar theft a problem in the UK?

Rural theft has long been an issue in the UK. It is a sinister practice, with repercussions that are as much emotional, as they are commercial. After all, for a small farm, solar panels are a huge investment. Not only that, but if solar theft is not brought under control, it will delay the country from reaching its net zero goals.

What happened to PV solar UK?

PV Solar UK went into liquidation in 2017. Robert Skillen, who was the director of the firm when Mr Thompson bought his system, said Mr Thompson's panels would make him money. Mr Skillen is now in business claiming to help people who have been mis-sold solar panels. He did not want to be interviewed.

Are solar farms a crime?

Inverters, solar batteries and converters (more commonly installed at residential sites) are also expensive pieces of equipment more vulnerable to theft. Other crimes impacting solar farms include vandalism and, perhaps surprisingly, protests and civil unrest. Vandalism is not always a planned, deliberate crime.
