How much power does a 2020 Fengjun 5 have?

There are 8 variants of 2020 Fengjun 5 pickup, including a total displacement of 2.4L and a total of 1 transmission options. The maximum engine power: 118.0kW, the maximum horsepower: 160PS, the maximum torque: 230.0N·m, the body length and width Height: 5095*1800*1730mm. Max.

What is a ring in a generator?

Retaining rings are among the highest stressed components of electrical generators, whose integrity is critical to the reliable and safe operation of the generators. Numerous instances of cracking of the rings, culminating in some cases in a catastrophic burst of the ring and extensive damage to the generator have been noted.

How many variants of 2020 GWM Fengjun 5 (Wingle 5) pickup are there?

Chinaev.com » All Brands » 2020 GWM FengJun 5 (Wingle 5) Pickup Technical Specs There are 8 variants of 2020 Fengjun 5 pickup, including a total displacement of 2.4L and a total of 1 transmission options.

What is a lightweight ring generator?

Lightweight Ring Generators can be used for several applications. A highlight is the construction and electromagnetic layout of the generator for gearless wind turbines >10 MW. For the proof of concept we set up a test bench to test our scaled demonstrator generator and its control. Improving the lifetime and reducing maintenance are

What causes a generator ring to crack?

Numerous instances of cracking of the rings, culminating in some cases in a catastrophic burst of the ring and extensive damage to the generator have been noted. A major cause of the failures is known to be the susceptibility of the currently used 18 Mn-5 Cr steel to environmentally induced cracking.
